**synchronization**  
for Sage 100

ROI Consulting, Inc. was established in 1997 with the mission to maximize your software investment with our innovative IN-SYNCH™ solution that integrates Sage 100 with any third-party system.

We are a Sage Software Gold Development Partner and specialize in performing website and other platform integrations – whether you need a brand new website, have an existing web store, or have other third-party applications you want to synchronize with your Sage 100 solution for up-to-the minute accounting information.

With hundreds of integrations under our belts, our experts can integrate Sage 100 with just about anything!

We have had great success utilizing the IN-SYNCH integration with our Magento to Sage 100 setup. Anytime we need assistance it is provided quickly and efficiently! We happily refer IN-SYNCH!

# website integration

with Sage 100

## IN-SYNCH facilitates Sage 100 integration with any website platform.

Whether you need a brand new site with an integrated shopping cart, want to connect Sage 100 to an existing cart/carts, or need to build a custom solution, ROI Consulting offers the experience of nearly 20 years and hundreds of integrations to make the process smooth and efficient.

### New, fully integrated web store

Our web development alliances specialize in new website solutions for Sage 100 customers for just about any budget. Whether it be a Sage 100 optimized web store solution, like Clearline.com, or a solution built on off-the-shelf shopping cart platforms such as Magento or Amazon, we can help.

### Connect with an existing shopping cart

IN-SYNCH gives you the convenience of selecting the cart or carts with the features you love and getting it integrated with Sage 100 quickly and efficiently. With experience integrating over 20 different popular shopping carts and web stores, such as Magento, Shopify, WooCommerce, Amazon, ebay, Yahoo, and more, you can pick the e-commerce solution – or solutions – that work for you.

### Custom integrations

Have a custom website? It's no problem! We can either build the customized website connection for you or work with your development team to connect the cart.

real time, bi-directional synchronization • lightning fast • secure  
24/7 independence • flexible & scalable

unique capabilities

# IN-SYNCH's intelligent synchronization

# BEST in class

No other Sage 100 integration solution provides **ALL** of these benefits:

### real-time, bidirectional synchronization

Sage 100 and the website or database are provided with **automatic, real-time changes and updates** as they occur, no matter where the data originates from.

### lightning fast

IN-SYNCH uses the **most efficient data mirroring methods available** so you can receive orders, new customers, changes, and updates automatically as they happen with maximum speed.

### secure

Data exchanges are initiated and controlled from within the Sage 100 server, making IN-SYNCH **the most**

**secure architecture possible.** Plus, security will never equal downtime. You still get maximum speed without the need for outside access to the ERP system server.

### 24/7 independence

Our solution allows for the integrated systems to **run independently**, so if one is down for maintenance, the other system stays up. The two will sync up automatically.

### flexible & scalable

Integrate with **unlimited shopping carts and databases.** IN-SYNCH **scales with you** and can migrate with a new website or software upgrade, producing limited downtime.
