

Anne Arundel Medical Center Found the Customizable Software They Need in LeaseQuery

LeaseQuery was definitely knowledgeable, they understood what we needed to do and how we needed to do it in the easiest way possible.

The Challenge

Despite having a smaller lease portfolio, the accounting team of Anne Arundel Medical Center knew that Excel would not be robust enough to account for their leases under the new lease accounting standard. The accounting team was searching for a software that was easy to use that could handle all of their auditing and reporting needs, within their budget.

Additionally, they wanted to work with a reputable company that was used by larger organizations, including those in the healthcare space.

LeaseQuery checked all of those boxes for them.

LEASEQUERY + ANNE ARUNDEL MEDICAL CENTER

The Anne Arundel Team Can Now Account for Their Leases With Ease

The team reviewed lease accounting software from several companies, but none of them passed muster. After getting a recommendation from a Big Four firm, Anne Arundel Medical Center reached out to LeaseQuery.

They sat in on several demos and liked that the software was easy to use and built by a team of accountants. *“LeaseQuery was built for the new lease pronouncement whereas other systems adapted for it,”* said Dass. The Anne Arundel team felt that the LeaseQuery team was responsive and resourceful. Additionally, the software’s ability to create custom templates will help the Anne Arundel team save time and resources.

The team was so pleased with the implementation process that they recommended LeaseQuery to another not-for-profit healthcare organization. Now, they’re able to get a head start on their adoption of the new lease accounting standards.

“

LeaseQuery was built for the new lease pronouncement whereas other systems adapted for it. It is easy to use and we were able to fast track and get our system up and running quicker.
